**CALL TO REGISTER: 610-829-6278—Nate Pritchard**

***Seating is limited! Register by February 4th!***

*This workshop series will allow you to work with Conservation District staff to develop a Manure Management Plan for your farm. Whether you have a smaller hobby farm, a large dairy, horses, beef, sheep, or other animals, this workshop is for you. A manure management plan will help you get the most out of your nutrients, and establish good conservation practices for your farm. State regulations require all agricultural animal operations to have a plan. NCCD presents this workshop free of charge, but registration is required. Please plan to attend both sessions!*

*Presented By:*

**Northampton County  
Conservation District**
