*Button Cell Batteries with numbers that start with an "L" can be safely thrown away or recycled as alkaline or lithium batteries.

*Button Cell Batteries with identification numbers that begin with an "S" contain mercury and can be taken to an HHW or E-waste collection event for recycling.

**Alkaline batteries are required to have zero-added mercury and are not considered hazardous. Alkaline batteries are deemed safe to throw away as trash, in small quantities, however they can be recycled.
